PROFILE INFO

I am a passionate Junior Software Engineer, specializing in front-end development using React. As an advocate for web performance and accessibility, I create amazing web applications to make the internet a better place.

WORK EXPERIENCE

Self-employed Frontend Developer

2023

By taking several courses I learned essential frontend skills, and built many projects that you can find on my portfolio [website](#).

System Administrator Mercator S

2018 - 2023

Working with windows servers, and their configuration. I made several surveys on the Sharepoint website and improved several IDEA stores across the country.

Search Engine Optimization Manager Austria Learning

2020 - 2021

Gained experience in recognizing common technical issues and explaining their solutions coherently, ensuring that clients and teammates understand the recommendations.

Search Engine Optimization Manager Titanium Success

2019 - 2020

Planning and implementing an SEO strategy, and collaborating with web developers and content team.
